

Software Engineer

Accelerated Manufacturing Brokers, Inc. - Asbury, NJ

Description

At Accelerated Manufacturing Brokers, Inc., we are always looking for additions to our team. We're kinda hoping that addition is you. We are a small business that deals with asset trading in the manufacturing sector. We design and build websites for marketing our clients. We also build modern web applications for asset management.

As a software engineer you will be responsible for development of our listing software. Some tasks that will be asked of you are:

- Adding a new feature
- Server administration
- Software security
- Database management
- Coordinate releases and deployment

Requirements

- Be well versed in at least one compiled, one interpreted language and one web framework
- Be able to implement and use tools like Git Flow for organization
- Have 1+ years of experience with Node.js
- Be comfortable with CLI for admin and development
- Understand HTTP
- Be able to use and create RESTful resources

- Have experience with MongoDB

Bonuses

- Have worked with language abstractions like Sass
- Have experience running systems on EC2
- Can deploy an application to be highly available and fault tolerant
- Have experience with Meteor or another full stack framework
- Be able to write a practical test suite and push it to a CI server
