Basic concept of OpenAPS & Nightscout

software

step 1

jubiLINUX

step 2

Github

step 3

Nightscout

sound different alarms
and send notifications

flashing the board

clone OpenAPs repo
and configure loop

**Explorer Board Block
+ Intel Edison**

(intel) Edison

What will you make?

900MHz Explorer Block
GMD – 2016

router

computer

hardware

communicates by using
low-rate wireless
personal area networks
(IEEE 802.15.4 / LR-WPAN)

using wifi or bluetooth

smartphone

smartphone

**Medtronic
compatible pump**

2:33P
24 Hour

ESC   ACT

data

gathering, analyzing and applying
closed-loop technology

uploading

displaying
